

Laundry Room Floors

The board has chosen Granite Garage Floors to redo the laundry Room Floors.

This is a two-week project. It will start on February 11th on the even floors (10,8,6,4).

Washers & dryers will be moved out of the laundry rooms on the 11th. On the 12th the existing floor will be removed. Then an epoxy is applied, and color flakes are casted.

This will have a strong odor. It will dry for a day, and then a clear coat is applied.

On Friday the washers & dryers will be reset.

The next week the same will take place on the odd floors (9,7,5,3).

During the service time there will be no entry in the laundry rooms or electrical rooms,

Recycling bins will be set outside the laundry rooms. Please do not schedule any A/C service if your condenser unit is in the electrical rooms (03,04,05,06,07 units).

Looking forward to the completed project.

Thank you for your patients and understanding.
